

The Justin

Enter Down & Putts Scoring

Enter the number of shots it takes you to get from the tee to inside of 100 yards. Give yourself a (✓) mark for two shots or less, an (X) mark for three or more shots. Write down the total shots it takes to get inside 100 yards.

Down is the number of shots it takes you to get into the hole from inside 100 yards. Give yourself a (✓) for three shots or less, an (X) otherwise. Write down the total shots it takes to get the ball in the hole from inside 100 yards.

Putts is the total number of putts it takes once on the green. You get a (✓) for two putts or less, an (X) otherwise. Add the total number of putts.

The results: You should be practicing where you have more (X) marks than (✓) marks. More **Enter** (X) marks means range practice: tee shots and long irons. More **Down** (X) mark means chipping and short game work. More **Putts** (X) marks means more time on the putting green.

Fun fact: 99.99% of all golfers will have more **Enter** (✓) marks than **Down** or **Putts**.
